**EASA Modifications • Installation Kits
• Equipment • Installation**

Full System Integration

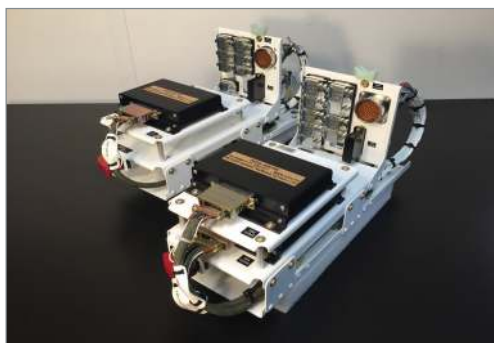

WIFI, Satcom, IFE, ISPSS, ADS-B Out, LPV App, EFB, CPDLC

EASA Modifications

We have designed over 800 modifications, consisting of EASA approved Minor Changes and Supplemental Type Certificates, on a wide range of aircraft types.

Our design activities are carried out under our EASA Design Organisation Approval (DOA).

Installation Kits

Our EASA Production Organisation Approval (POA) and AS9100 accreditation enables us to complement our design packages with the production of parts and assemblies.

Our Installation Kits are built in-house, ensuring a high-quality product, to promote efficient installations.

Equipment

We hold distributor agreements with several equipment OEMs. This means that our customers benefit from the pricing we can provide for avionics and cabin equipment.

OEMs include Universal Avionics and Collins Aerospace.

Installation

We can provide a team of experienced engineers to install a modification at your designated maintenance facility.

A dedicated Installation Team is efficient in terms of time and resource.
